

GISHA COIN

Whitepaper

Version 1.0 | BNB Smart Chain (BEP-20)

1. Introduction

Gisha is a community driven meme coin on BNB Smart Chain. It is made to help new people come into crypto in easy way, and also teach them the power of long term holding by giving real rewards.

2. Vision

Our goal is to make a friendly token that can:

- Help new people start in crypto
- Encourage long term holding
- Give monthly airdrop rewards to holders
- Be used as tip or goodwill gift
- Build strong community

3. Token Information

Detail	Information
Token Name	Gisha coin
Symbol	Gisha
Network	BNB Smart Chain (BEP-20)
Contract Address	0x8B98d6BEE599D1eA15dF3871560F585cA8002E72
Decimals	18
Website	https://www.gisha.io
Twitter	https://x.com/gishacoin

4. Tokenomics

Total Max Supply: 2,000,000,000 Gisha

Allocation	Amount	Purpose
Gisha Work Force	1,000,000,000	This 1 billion is permanently held and staked. It works for all holders, not for creators. The income (ROI) from staking go every month to the Airdrop Vault to reward holders.
Circulating Supply	1,000,000,000	This part is for community and project needs
Admin & Costs	10% (100M)	For running the project and administration costs
Monthly Reward Vault	10% (100M)	Reserved for the monthly VRF airdrops

Sold to Market	80% (800M)	Sold stage by stage based on supply need and community growth speed. Income from sales also go to the Airdrop Vault every month.
----------------	------------	--

Important points:

- Gisha Work Force is not belonging to creators. It only work to make income for all holders through monthly airdrops.
- There is no normal liquidity pool. The Work Force and the Airdrop Vault support the system.
- Tokens are sold stage by stage, not all at one time, depending on how fast community grow and supply need.
- Income from staking + income from selling both go to Airdrop Vault every month.
- Even only 1 Gisha in wallet count as full entry for the monthly draw.

So the system make a permanent loop: Work Force make income + sales make income → both go to vault → vault give airdrop to holders every month.

5. Core Features

Monthly VRF Airdrop

Every month all Gisha holders wallets go into VRF (Verifiable Random Function) system. Few lucky wallets get selected and receive large airdrop.

- Even 1 Gisha coin is enough to enter the draw
- This encourage people to keep holding in their wallet
- The draw is transparent and can be checked on chain

Community Focused

Made for normal people and new comers in crypto.

Simple Use

Can be used as tip, gift or goodwill between people.

Transparent

Everything is on chain and open to check.

6. How the Monthly Draw Work

1. Take snapshot of all wallets that hold Gisha
2. Every wallet with at least 1 Gisha get entry
3. VRF system randomly choose the winners
4. Large airdrop send to the selected wallets

This give real reason for people to hold the coin instead of selling.

7. Roadmap

Phase 1 – Launch and Community

- Token launch
- Website and social media
- First monthly VRF airdrop

Phase 2 – Growth

- More rewards for community
- Marketing and partners
- Bigger airdrop size

Phase 3 – Expand

- Add more utility
- More features from community ideas

8. Disclaimer

Gisha is a meme coin made for community and learning purpose. Crypto has risk. Please do your own research before buy. This paper is not financial advice.
